Career Objective

Motivated AI/ML student with strong skills in Java, Data Structures, and Machine Learning, seeking a software engineering role to develop scalable and efficient solutions.

Education

- **NMAM Institute of Technology Nitte (2023-2027)**
CGPA: 8.63
- **Sri Channabasaveshwar Gurukul pu college Bidar (2021-2023)**
Karnataka Board
Percentage: 75.3
- **Guru Nanak Public School Bidar (2021)**
Central Board of Secondary Education
Percentage: 73.0

Technical & Soft Skills

- **Languages & Web:** Python, Java, SQL, HTML, CSS
- **AI/ML:** Machine Learning, Deep Learning, CNN, Computer Vision, TensorFlow, Scikit-learn
- **Soft Skills:** Communication, Leadership, Time Management

Projects

- **Deep Fake Image Detection (2025)**
Technologies: Python, TensorFlow, CNN, OpenCV
 - Built a CNN-based classifier achieving **93% accuracy** in detecting deep fake vs. real images.
 - Applied data augmentation techniques, increasing training diversity by **40%**.
 - Fine-tuned the model using dropout and batch normalization, reducing false positives by **25%**.
- **Hotel Management System (2024)**
Technologies: Java, SQL, HTML, CSS, JavaScript
 - Developed a full-stack system for room booking and administration handling **50+ room records**.
 - Implemented secure authentication, dynamic pricing, and payment handling, reducing booking errors by **30%**.
 - Optimized SQL queries, improving data retrieval speed by **35%**.

Certifications

- Computer Vision from IBM Skill Build (2026)
- Python for Machine Learning from GreatLearning (2025)
- AI for beginners from HP Life (2024)

Languages

- English, Kannada, Hindi
